Community Physicians: New Meaning to Meaningful Use

Independent Physicians Collect on Incentive Payment with EHR Adoption

Get Your Share of Incentive Payments

Medicare has paid out millions of dollars to qualifying physicians yet when taking a look closer to who is getting the reimbursements you will find large medical groups with employed physicians and IPAs are getting the lion’s share. What about the community independent physicians? Are they getting their share of the payouts? Who is making sure they are meeting Stage 1 Meaningful Use criteria?

CHMB has consistently provided superior services to independent community physicians. Private practice physicians are the backbone of healthcare and each practice has unique needs which must be taken into account when transitioning to EHR. CHMB designed their EHR Implementation Services with the end game in mind.

Qualify. Achieve Meaningful Use. Incentive Payout.

CHMB’s EHR specialists educate the physicians on incorporating EHR workflows into their daily tasks, adapt to the criteria needed for clinical documentation, and aid them in becoming proficient in their use of the paperless workflow.

Commitment to Reach EHR Meaningful Use Pays Off

“My goal in EHR adoption was to connect with my health system electronically and qualify for 2011 incentive payments. The transition had its challenges, however, CHMB was right there with me ensuring I was documenting and utilizing the EHR meaningfully. My commitment to make the move is paying off—the $18,000 check went directly into my account. My practice is moving in the right direction and connecting with other physicians & hospitals is closer than before. I am very happy to have made the investment of my time and money and had CHMB with me to achieve success.” Steven Higgins, MD—Cardiac Arrhythmia & Associates
